PREM SHANKAR RAI

Full Stack Developer (MERN) — React.js · Node.js · Express.js · MongoDB · AWS

+91 7250422265 | premshankarrai2005@gmail.com | Portfolio | GitHub | LinkedIn

SUMMARY

MERN-stack developer who ships secure, production-ready web apps end-to-end. Built and scaled a cloud file-storage platform to 100+ concurrent users, cutting backend response time through targeted performance optimization. Comfortable owning a feature from database schema to deployed UI.

TECHNICAL SKILLS

Languages/Frontend: JavaScript (ES6+), HTML5, CSS3, React.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Auth, Middleware, RBAC, Session Management

Data/Cloud: MongoDB, Redis, AWS EC2, AWS S3, Git/GitHub

Tools: Postman, VS Code, Figma

EXPERIENCE

Full Stack Development Intern | Tetroinfotech *Apr 2025 – May 2025*

- Shipped a cloud-based file storage app (React.js, Node.js, Express.js) used by 100+ test users, validating scalability and performance under real load.
- Cut backend response time and memory usage by moving file handling from buffers to Node.js streams.
- Built secure session management and authentication, closing vulnerabilities found during security review.

PROJECTS

College Inventory & Asset Management System | MERN Stack · Team of 2

- Co-built a role-based inventory platform covering procurement, vendor quotations, purchase orders, asset allocation, transfers, and lifecycle tracking for a college campus.
- Engineered a 9-stage approval workflow (Purchase Request → Principal Approval → RFQ → Quotation Comparison → PO → Material Receipt → QC → Payment → Stock/Asset Entry) with full status history and audit tracking.
- Designed a digital Gate Pass with QR/ID verification, letting security staff validate asset and material movement across campus in real time.

My Drive — Cloud Storage Application | Solo Project

- Built a secure cloud-storage app (React.js, Node.js, Express.js, MongoDB) handling JWT auth, protected file access, and 100+ active users.
- Replaced buffer-based file handling with Node.js streams for uploads/downloads, cutting server memory usage and improving performance on large files.
- Designed folder hierarchy management, shareable file links, and a storage-tracking dashboard.

EDUCATION

B.E., Computer Science & Engineering *2023 – 2027 (Expected)*

PSN College of Engineering and Technology, Tirunelveli | CGPA: 8.6/10
